# RESTLESS TRACES: LEAVES *by* Shelley Jordon

---

**FROM OCT 18TH TO OCT 26TH, MON-FRI 5.00-7.30PM**  
**LdM GALLERY, VIA DE' PUCCI 4, FLORENCE**

*US artist Shelley Jordon experiments with different materials to create fluid, evolving artworks that expand through time and different media.*

*In a time of disquieting inconsistency, nature allows the artist an opportunity for reflection, a sanctuary where she observes the traces left by time on natural matter, such as decaying leaves. With her work, Jordon depicts the natural cycle of life, capturing the fragility of a reality in transition, where the boundaries between the inner and external world no longer exist.*

*LdM Gallery is a project by Istituto Lorenzo de' Medici.*
